

Fairmont tongs, also known as forged hand seamers, are powerful and versatile additions to any tool box. They are used in HVACR, metal roofing, and many other sheet metal applications. Fairmont tongs are forged and plated -- and fully guaranteed against manufacturing defects. Bending depth marks on tong jaws. Regular or offset handle models. Also available with cushion grip handles, which provide a softer, more comfortable grip. Tongs are 9-1/2" long, with a 3" wide by 1-1/8" deep jaw.
