

**TENNSMITH MODEL S48-22, STRAIGHT
4' x 22ga BENCH MODEL HAND BRAKE**

Tennsmith's bench-mounted hand brakes are rugged, dependable USA-made tools that won't break your budget.

Models U48-22 and S48-22 are lighter capacity versions of the four-foot bench brake, which offer economical alternatives in working 22-gauge and lighter materials. Also, their lighter weights make these models better suited for transporting to remote job sites.

TENNSMITH's bench-mounted hand brakes provide an economical means of performing a wide range of sheet metal bending and forming operations. These brakes are of all-steel welded construction, readily adjustable and utilize bronze bearings at pivot points.

Model S48-22 Shown With Optional Floor Stand

TENNSMITH hand brakes are the heaviest built domestically made units on the market today.
