

# TENNSMITH

*A family tradition since 1928.*

MODEL  
DS24-20

TENNSMITH's cheek bender is a rugged tool built for increased productivity while getting the most consistent bends quickly. The Model **DS24-40's** two-way trunnion design holds the bending apron steady at the base of the bend ensuring accuracy throughout the length of the sheet.

This machine can be bench-mounted and adjusts for bends of 1/4 to 7/8 inches, 24 inches long. The TENS SMITH cheek bender handles mild steel to 20-gauge.
