

# Anti-Vibration (AV) Pads

Wide selection of type of pads to fit your needs. From the best in the industry to the industry standard, DiversiTech has them available for you.

- EVA™ Pad – (Extreme Vibration Attenuation) The best performer for when performance matters
- ISO-Cube – Economical yet solid rubber tough designed to withstand greater loads (up to 180 psi)
- Rubber/Cork – The industry standard
- Basic rubber pads – most economical

## EVA Anti-Vibration Pad

The latest generation in vibration dampening technology. The most effective vibration dampening pad available on the market. The EVA Pad was tested against other pads at four different vibration settings. In the most severe vibration extremes, the EVA Pad outperforms cork and rubber by a margin of greater than 3:1! This is due to the special composite foam center which is much more structurally sound than cork.

It is not affected by oils or chemicals that can break down cork and is much more effective at vibration dampening than solid rubber. All this at a very competitive price. Designed to withstand 50 psi.
