

PINK BUTYL GASKET

\$2/box sold will be donated to the BCRF

This new Pink Butyl Gasket from Duro Dyne has a special 'H' shaped pattern to provide 4 points of contact to the metal for a secured air tight seal. It also has a lower compression resistance; excellent resistance to water, alcohols, mild acids and mild bases; is non-corrosive; considered a non-irritant for "appraisal of the safety of chemicals in food, drugs and cosmetics"; and can be applied for LEED credit. The pink color is highly visible for easy inspection on the job site while of course furthering the awareness of the need to join the fight against breast cancer.

The mission of the Breast Cancer Research Foundation (BCRF) is to prevent and cure breast cancer by advancing the world's most promising research. To help further the cause of the BCRF, Duro Dyne decided to partner with them and hold a machinery auction in 2017 which resulted in \$65,885 being raised for Breast Cancer Research.

In honor of this great cause and the continued need for funding and awareness, Duro Dyne will contribute \$2 to the BCRF for every box (500 ft) of Pink Butyl Gasket sold.
