

Versa Cleater Tool for use with Ductmate Versa Cleat

Versa Cleat

Versa cleat works on:

DM35 to DM35 WDCI "J" to WDCI "J"
DM45 to DM45 WDCI "J" to TDC
TDC to TDC
DM35 to TDC

May work on TDF to TDF depending on gauge and age of machine the TDF is rolled on; would need to try the cleat to be sure.

Versa cleat does not work on:

DM25
WDCI 'H'

Trouble applying Versa cleat:

When using Versa cleat on 18 gauge duct, apply the gasket on the outer edge of the face of the flange.

OR

Use a pair of vice grips to squeeze the flange together and cleat should snap on very easily.
