

HVAC 510-SL Liner Cutting Table

Duct Liner Cutting System

Features & Benefits

- Economical, stand-alone machine dedicated to cutting duct liner in low and high volume shops
- For users with existing plasma cutting systems that need additional liner cutting capability
- Available in table sizes: 5'x10', 5'x20', 6'x10', 6'x20'
- Patented systems to hold and cut duct liner. (Patent # 6,540,456)
- Vicon HVAC Cutting Software with automatic liner downsizing
- Synthetic table surface for smooth liner cutting
- Dual rack and pinion drive on both axes for greater positioning accuracy
- Aluminum gantry results in "low inertia" for greater part accuracy
- Roller guides on both axes for greater rigidity, stability and accuracy
- Traversing speed up to 2,000 inches per minute
- Non-lubricating gears and bearings

Specifications		
Effective Cutting Area	(Standard) (Optional)	5'x10' 5'x20',6'x10',6'x20'
Machine Length		144"
Machine Width	(Standard) (Optional)	90" 102"
Table Height		35"
