

# AIR REGULATION

## Dyna-Click™

PATENT  
PENDING

Dyna-Click is the latest in self-locking regulators offered by Duro Dyne. This 15 position indexing regulator features a triggerless 3/4" twist locking nut that fixes the regulator in place once set. Designed for use with square rod on both square and round externally insulated duct, it is offered in two standoff heights, 1-1/2" & 2". The Dyna-Click is engineered with a heavy duty spring so it stays set once clicked into place. The high visibility handle is angled to indicate the position of the damper blade. The handle is also yellow in color, allowing it to be easily found in the field on wrapped duct.

Set screw to secure 3/8" rod in place

10° angled stand to accommodate both square and round duct

Manual operation (no tools)

Simply push down and lock into one of 15 positions

Marking on regulator easily show the open-close positions

Pre-notched feet for use with HETO (High Efficiency Take Off) application. Simply cut to the notch with a snip.

Also available with a Cast Metal Handle!
