

# ROLLFORMER. 5V CRIMP MACHINE

Although originally an agricultural panel, the 5V crimp is now a popular residential panel. Mount the 5V machine in your shop or make it portable and take it to the jobsite. The 5V machine features a hydraulic drive and front hydraulic scissors shear, adjustable panel width capability 14" to 28". The "traditional size" 5V Panel is feeding the machine 27 1/2" coil stock, giving you a 26" wide finished panel with 24" coverage with the overlap.

## Standard Features:

---
