

SELF STICK ACCESS DOORS

Access doors are used in duct systems for many reasons. Entry is often required to facilitate duct cleaning, examine equipment, or to test, repair, or troubleshoot system components.

NHSAD & NCSAD Self Stick Access Doors provide an easy four step solution. Size and cut a hole in the duct wall. Peel the release paper from the foam gasketed access door frame. Press the frame into position. Insert one screw into each of the four pre-punched holes in the frame.

Cam Only access doors are typically used in tight spaces where a hinge is not functional. The anti-runaway Safety Cable on the CSADSC Access Door prevents the door from dropping on the jobsite and getting lost or damaged.

NHSAD

NCSAD

FEATURES:

- 24 gauge galvanized steel construction
- Saves time and is easy to position - No frame "dove tails" to align and bend
- No duct sealer or tape needed for full seal
- 10 stock sizes from 6x6 through 24x24
- Tested to 10"SP with less than 2% leakage
- One inch wide gasketed frame for fastening and sealing integrity
- Doors insulated with one inch thick fiberglass
